PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing and supporting enterprise-scale customer-facing applications using C#, .NET Core, ASP.NET Core Web API, Angular, and Microsoft SQL Server. Experienced in REST API development, application modernization, production support, SQL performance tuning, Azure/AWS environments, CI/CD, and release management. Strong understanding of Agile Scrum, SDLC, incident management, and root cause analysis, with hands-on use of GenAI tools to improve development productivity and technical documentation.

TECHNICAL SKILLS

Languages: C#, SQL

Frameworks: .NET Core, ASP.NET Core Web API, Angular, Entity Framework Core

Database & Backend: Microsoft SQL Server, Oracle, REST APIs, LINQ, Stored Procedures, Query Optimization

Cloud & DevOps: Microsoft Azure, AWS, Azure DevOps, CI/CD, Git, GitHub, IIS, Release Management

Engineering: OOP, SOLID Principles, Dependency Injection, Agile Scrum, SDLC, Incident Management, RCA

AI Tools: GitHub Copilot, Claude AI, Codex

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions, Chennai

Jr Software Engineer

Oct 2025 – Present

Programmer Analyst Trainee

Oct 2024 – Sep 2025

- Promoted to Jr Software Engineer within one year based on consistent performance and ownership of business-critical applications.
- Develop, enhance, and support 10+ enterprise customer-facing applications using .NET Core, ASP.NET Core Web API, Angular, Entity Framework Core, and Microsoft SQL Server.
- Independently manage 7 production applications, taking ownership of feature enhancements, incident resolution, production support, deployments, and release activities.
- Build and maintain RESTful APIs, troubleshoot application issues, optimize SQL queries, and perform root cause analysis to improve reliability and performance.
- Contribute to application modernization and deployments across Git, IIS, Azure, and AWS environments while supporting CI/CD pipelines and release processes.
- Collaborate with Business Analysts, QA, DevOps, and client teams in Agile Scrum environments, participating in sprint planning, code reviews, and production releases.

KEY PROJECT EXPERIENCE

AGCO – CO-IT Applications Outsource | .NET Core, Angular, SQL Server, Azure DevOps

- Own, support, and develop 10 business-critical customer-facing applications, handling enhancements, production incidents, SQL performance issues, deployments, and release activities.

PG&E – ALM Application Upgrade Service | .NET, Oracle, Application Modernization

- Modernized legacy applications by upgrading to newer .NET environments, refactoring modules, resolving issues, and improving maintainability.

NRG Energy – DE Application Development | .NET, SQL Server, ServiceNow

- Delivered backend enhancements, production defect fixes, and SQL optimizations through debugging, testing, code reviews, and release cycles.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate

Microsoft Certified: GitHub Administration

Microsoft Certified: Azure Fundamentals (AZ-900)

Anthropic Certified: Claude Certified Architect – Foundations

EDUCATION

Bachelor of Engineering in Computer Science

Sathyabama Institute of Science and Technology, Chennai

2020 – 2024

CGPA: 9.08
