## PROFESSIONAL SUMMARY

---

Software Engineer with 1.8+ years of experience in developing, enhancing and supporting enterprise-scale customer-facing applications using .NET Core, ASP.NET Core Web API, Angular and MS SQL Server. Experienced in designing RESTful APIs, production support, application modernization, cloud technologies (Azure), CI/CD, deployment management and SQL performance tuning. Strong understanding of Agile Scrum, SDLC, incident management and release processes. Regularly leverage GenAI tools including GitHub Copilot, Claude and ChatGPT to improve development productivity, code quality and technical documentation.

## TECHNICAL SKILLS

---

**Languages:** C#, SQL, TypeScript

**Frameworks:** .NET Core, ASP.NET Core, ASP.NET Core Web API, Angular, Entity Framework Core

**Database:** MS SQL Server, Stored Procedures, Query Optimization

**Cloud:** Microsoft Azure, AWS

**DevOps & Tools:** Git, GitHub, Azure DevOps, CI/CD, IIS, Release Management

**Development:** REST APIs, OOP, SOLID Principles, LINQ, Dependency Injection

**Methodologies:** Agile Scrum, SDLC, Production Support, Incident Management, Root Cause Analysis

**AI:** GitHub Copilot, Claude AI, ChatGPT, GenAI-assisted Development

## PROFESSIONAL EXPERIENCE

---

**Cognizant Technology Solutions, Chennai**

**Jr Software Engineer**

Oct 2025 – Present

**Programmer Analyst Trainee**

Oct 2024 – Sep 2025

- Promoted to Jr Software Engineer within one year based on consistent performance and ownership of business-critical applications.
- Develop, enhance and support 12+ enterprise customer-facing applications across two business towers using .NET Core, ASP.NET Core Web API, Angular, MS SQL Server and Entity Framework Core.
- Independently manage 7 production applications, handling feature enhancements, production support, incident resolution, deployments and release activities.
- Build and maintain RESTful APIs, optimize SQL queries and implement scalable backend solutions while following OOP and SOLID principles.
- Perform deployments across Git, IIS and Azure environments, supporting CI/CD pipelines, application modernization and release management.
- Collaborate in Agile Scrum teams with Business Analysts, QA, DevOps and clients, participating in sprint planning, code reviews and production releases.
- Utilize GitHub Copilot, Claude and ChatGPT to accelerate development, debugging, documentation and code quality.

## PROJECTS

---

### AGCO – CO-IT Applications Outsource (Current)

- Independently manage 7 business-critical customer-facing applications built using .NET Core, Angular and MS SQL Server, providing end-to-end application ownership including enhancements, production support and deployments.
- Resolve production incidents through Root Cause Analysis (RCA), SQL performance tuning, debugging and log analysis while ensuring high application availability and service reliability.
- Perform application deployments across Git, IIS and AWS environments, supporting CI/CD release activities, environment validation and production rollouts.

### PG&E – ALM Application Upgrade Service

- Modernized enterprise applications by migrating legacy solutions to newer .NET environments, improving maintainability, security and application performance.
- Refactored existing modules, resolved production issues and collaborated in Agile Scrum teams to deliver enhancements within scheduled release cycles.

### NRG Energy – DE Application Development

- Developed backend enhancements, fixed production defects and optimized SQL queries for enterprise applications built using .NET and SQL Server.
- Participated in code reviews, debugging, testing and production support while gaining hands-on experience with enterprise SDLC and release management processes.

## PERSONAL PROJECTS

---

### Healthcare Management System

Technologies Used: ASP.NET Core, MS SQL Server, Angular, Entity Framework Core

Developed a full-stack healthcare application to manage patient records, doctor profiles, appointments, and prescriptions.

GitHub: [github.com/kiruthiknivas/Healthcare-Management](https://github.com/kiruthiknivas/Healthcare-Management)

### Blog Page Management System

Technologies Used: ASP.NET Core, MS SQL Server, Entity Framework Core

Built a backend system for a blog platform with user authentication, post creation, and comment handling.

GitHub: [github.com/kiruthiknivas/Blogpage-Project](https://github.com/kiruthiknivas/Blogpage-Project)
